

Building a Connected Future: The Power of Interconnection

Tat Inn Cheam
Managing Director, Malaysia

Who is Equinix?

All about Equinix

25+ years of experience

Founded in 1998, we are a global leader in digital infrastructure

\$72.7B market cap¹

Listed on NASDAQ

10,000+ customers

Creating robust ecosystem

40%+ cloud edge nodes in Equinix data centers

Over 40% of listed hyperscale cloud edge nodes are in Equinix (based on markets where Equinix is located).

260 data centers worldwide

Our global footprint spans 6 continents, 33 countries and 71 metro areas.

11,000+ employees

468,000+ interconnections²

Our ecosystem generates significant traffic and continues to rapidly grow.

\$8B+ revenue

85 quarters of consecutive top-line growth

100% renewable power pledge

96% Renewable Coverage globally against our 100% goal

1. As of May 2024

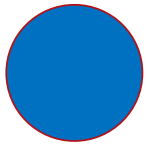

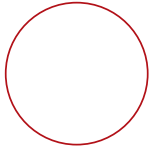

2. Total interconnections include both physical cross connections and virtual connections.

Is Equinix an Data Center?

Equinix is an Interconnection Data Center

Digital businesses choose Equinix robust private connectivity to their service providers and business partners

Types of data center	Core activity	Level of Interconnection
 Retail	Direct and private interconnection between a large number of diverse end-customers , each housing small but mission-critical networking & computing deployments in need of exchange of data	
Wholesale colocation	Hosting of digital infrastructure for a limited number of end customers , each occupying a large amount of space within the data center, and interconnecting infrequently	
Hyperscaler	Housing of digital infrastructure for a single company's business operations . No provision of direct private connectivity between end customers.

How does Interconnections look like in a Data Center

This illustration represents a single location with over 40,000 interconnections between **Network**, **Content**, **Cloud** and **Enterprise** participants in a typical colocation hub.

Network Providers creating direct connections to other providers, scaling capacity for the internet, and provisioning bandwidth to Cloud & IT Services.

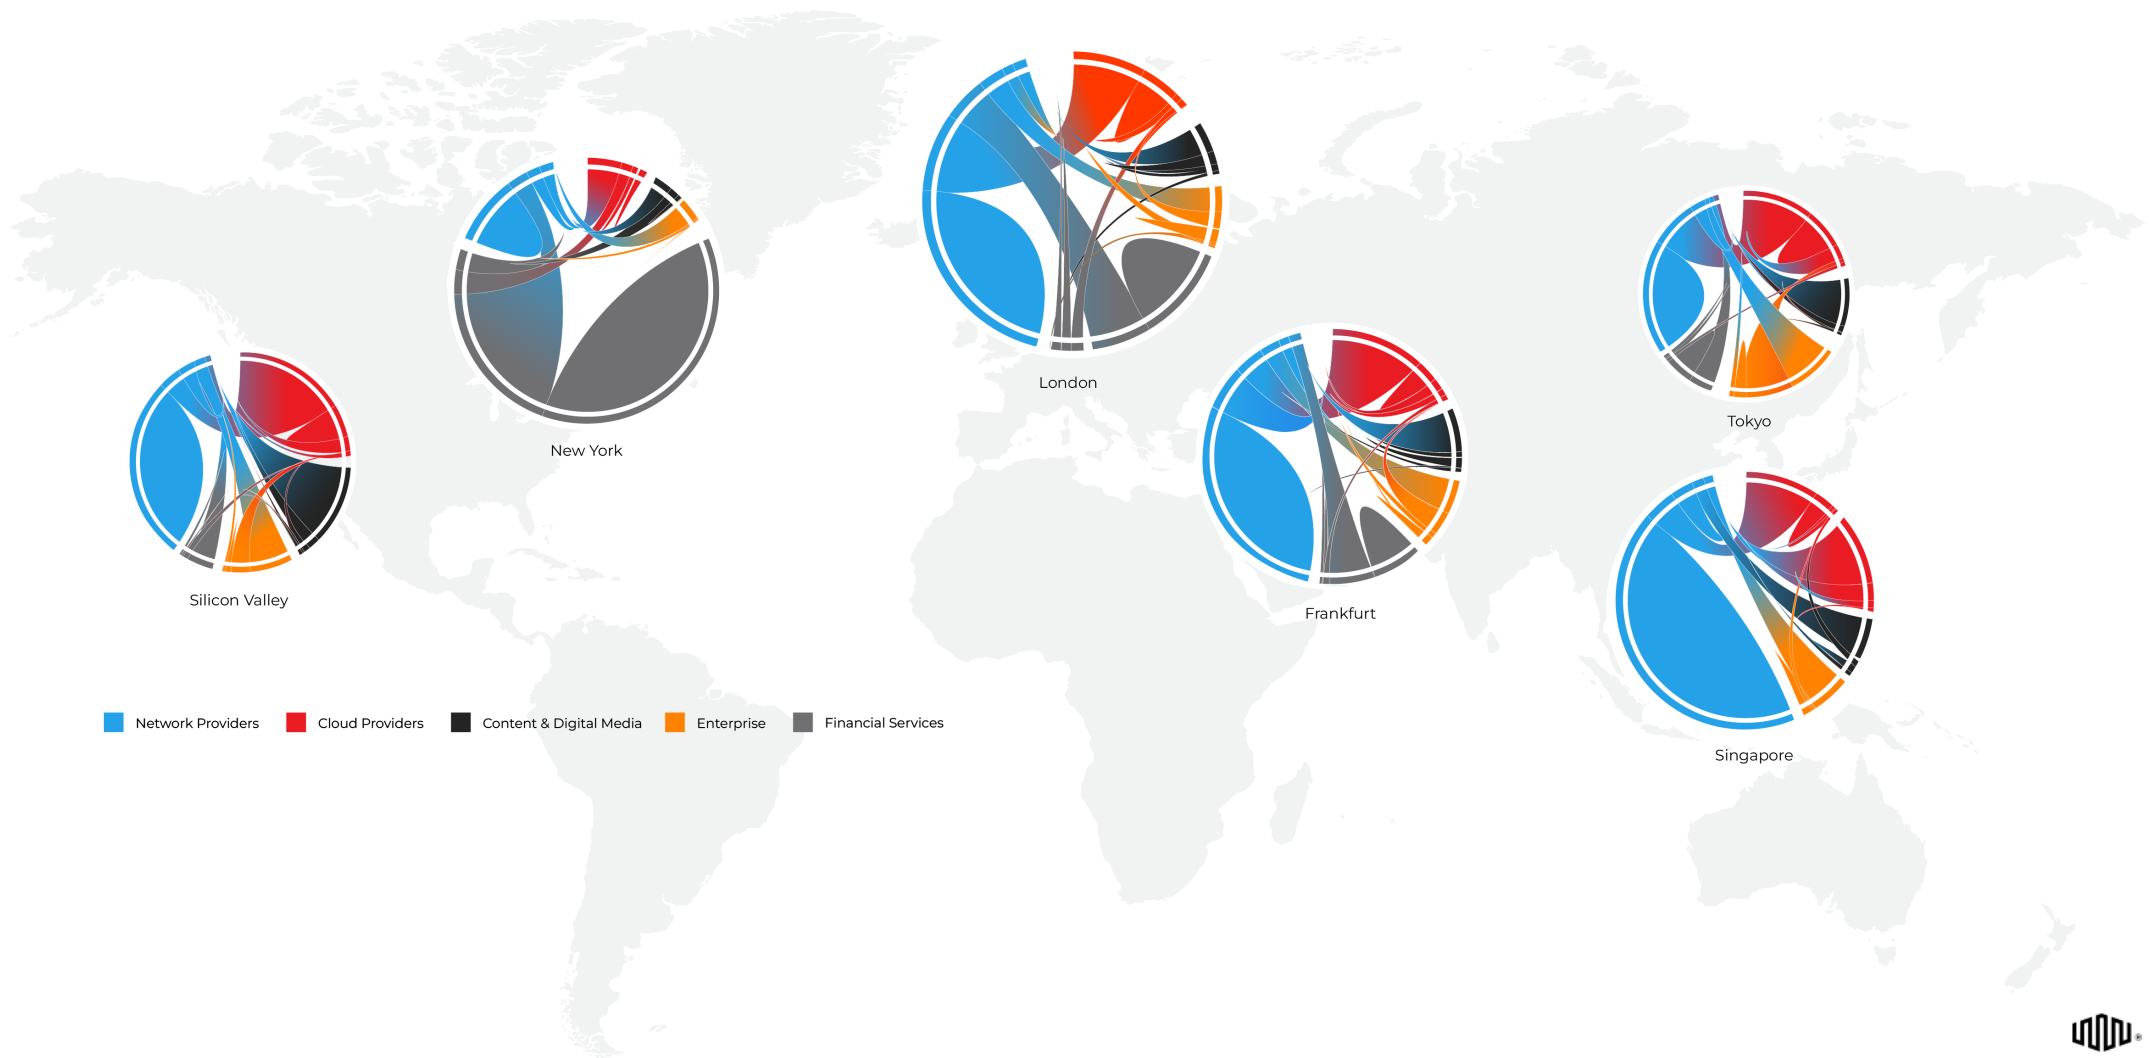

Cloud & IT Providers are directly peering with **Network Providers** and other digital providers in order to deliver composable services across Enterprise and Financial Services.

Content & Digital Media providers are interconnecting delivery networks to meet the omnichannel requirements for streaming, gaming and interactive content.

Enterprise leaders are directly connecting with multiple **Network** and **Cloud & IT Providers** as well as their business ecosystems including Payments, FinTech, InsurTech, HealthTech, AI, and Manufacturing ecosystems.

Financial Services leaders are directly connecting with **Network Providers** and Financial leaders from capital markets, FinTech and digital banking ecosystems.

Interconnection: Digital Economy

How is Equinix relevant to NSP?

Top Digital Trends Driving NSP's Transformation

44% of providers rank Cloud technologies and providers (including IaaS, PaaS and SaaS partners) are ranked as the #1 or #2 transformation activities¹

81% of providers plan to increase their engagement with ecosystem partners in 2023, a doubling over 2022, and ahead of other industries.²

54% of providers say *Improving customer experience* is their top transformation goal ahead of cost, agility and revenue generation metrics.¹

Operational flexibility (22%), rapid innovation (21%) and adding new sources of revenue (20%) are ranked the **top 3 benefits** of ecosystem participation ²

¹ Telco Transformation Survey, IDC, 2022 (N. America & W. Europe) (n=50)
² Future Enterprise Resiliency & Spending Survey - Wave 2, IDC, March 2022

Equinix Fabric-enabled Metros

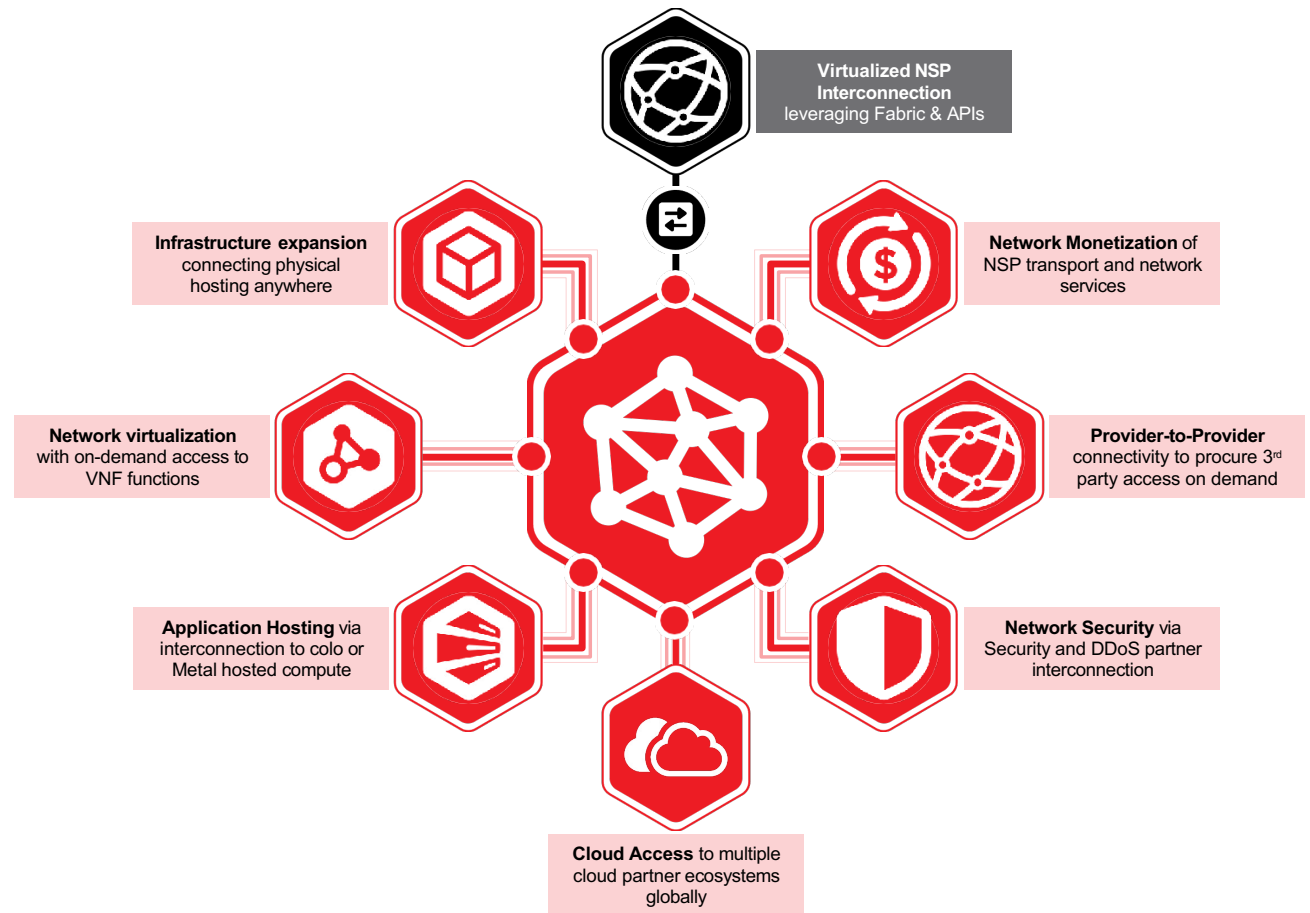

Digital Interconnection to Power the Transformation of NSPs

Digital Interconnection leverages Equinix Fabric to create an **API-enabled interconnection platform upon which NSPs build their next-generation networks and services.**

Digital Interconnection allows NSPs to turn up, and scale, networks on-demand in a primarily **OPEX-based financial model.**

Digital Interconnection creates new ways for NSPs to **monetize their networks** while **connecting to globally deployed hosting infrastructure and procuring access on-demand.**
